

PhD positions

available in the **First Team** project

New Applications of Droplet Microfluidics: From Biomimetics To Tissue Engineering

realized at Institute of Physical Chemistry of Polish Academy of Sciences, Warsaw in collaboration with:

• Princeton University (USA)

• Lehigh University (USA)

• Rutgers University (USA)

We offer:

- attractive net salary **4 500 PLN/month** (tax-free scholarship)
- possibility of a few-month internship at our partner institutions (USA)
- international PhD training program and work in a dynamic, interdisciplinary team

Requirements:

- completed MSc in physics, chemistry, biology, biotechnology or bioengineering
- excellent track record from undergraduate studies
- independent thinking, creativity and strong motivation towards scientific work

Please send your CV, motivation letter, reference letters (at least one) and transcript of records before **August 10th 2017** to the project leader dr Jan Guzowski, jan.guzowski@gmail.com. More details at www.janguzowski.com and at FNP websites:
