

CONTENTS

1085 **Professor Zbigniew Galus** — Kulesza P. and Lipkowski J.

RESEARCH ARTICLES

Interfacial Phenomena

1087 **Mixed Adsorption Layers Formed at the Electrode–Solution Interface** — Nieszporek J., Gugała D., Sieńko D., Jankowska J. and Saba J.

1103 **Hydrogen Atom and Hydrogen Ion Interactions with the [100] Surface of Transition Metals (Pd, Ni, Ag, Cu)** — Bartczak W.M., Romanowski S. and Stawowska J.

1121 **Electrosorption of Carbon Dioxide on Rh Binary Alloys with Pt and Pd** — Siwek H., Łukaszewski M. and Czerwiński A.

1135 **The Comparison of Electrochemical and Radiochemical Methods in Adsorption Study of Thiourea on the Polycrystalline Silver Electrode in Neutral Solution** — Łukomska A. and Sobkowski J.

1149 **The Adsorption and the Influence of Modified β -Cyclodextrins on the Kinetics of Several Electrode Reactions** — Trzciniński D., Kośnik W., Stroka J. and Temeriusz A.

1165 **New Methods to Study Thin Organic Films at Electrode Surfaces** — Zawisza I., Cai X., Zamlynyy V., Burgess I., Majewski J., Szymanski G. and Lipkowski J.

1183 **Two-Layer Structures of Ultra-Thin Metal Hexacyanoferrate Films: Charge Trapping and Possibility of Application to Corrosion Protection** — Miecznikowski K., Chojak M., Stepłowska W., Makowski O., Kulesza P.J., Adamczyk L., Malik M.A., Galkowski M. and Bala H.

New Developments in Electrochemical Methodology

1195 **Recent Developments in Digital Simulation of Electroanalytical Experiments** — Bieniasz L.K. and Britz D.

1221 **On the Role of Specific Characteristics of the Streaming Mercury Electrode in the Generation of the Nonlinear Electrochemical Dynamical Phenomena** — Orlik M. and Jurczakowski R.

1235 **The Influence of the Experimental Setup Upon the Modelling of the Impedance Spectra in Molten Salts** — Kiszka A., Kaźmierczak J. and Meisner B.

1245 **On Benefits of the Zero-Pole Representation of Electrochemical Impedance Spectroscopy Data Close to Discontinuity Point** — Sadkowski A.

1255 **Validity of Impedance Spectra Obtained by Dynamic Electrochemical Impedance Spectroscopy Verified by Kramers-Kronig Transformation** — Darowicki K. and Kawula J.

1261 **The Analysis of Stationary Electrochemical Noise** — Darowicki K. and Zieliński A.

1269 **Time-Frequency Characteristics of Chemical Oscillations. Experimental and Model Studies** — Darowicki K. and Felisiak W.

Electrochemistry of New Materials

1279 **Review of PEO Based Composite Polymer Electrolytes** — Florjańczyk Z., Marcinek M., Wieczorek W. and Langwald N.

1305 **Copper Metal Matrix Composite Cu-TiO₂ Electrodeposited in Aqueous Suspensions of the Nanometric Size Particles of Anatase and Rutile** — Medelienė V., Juškėnas R., Kurtinaitenė M. and Jaskuła M.

- 1319 **Modification of Boron-Doped Diamond Thin Film Surface by Covalent Attachment of Redox Active Molecules** — Krysiński P.
- 1327 **Electrochemical Synthesis and Properties of Micro- and Nanocrystallites of Cobalt** — Wiśniewski A., Paklepa P. and Wrona P.K.
- 1339 **Electrochemical Intercalation of ZnCl₂-CrO₃-GIC (Graphite Intercalation Compound) with Sulphuric Acid** — Skowroński J.M. and Urbaniak J.
- 1345 **Development of New Supercapacitor Electrodes Based on Carbon Nanotubes** — Frąckowiak E., Jurewicz K. and Béguin F.
- 1357 **Applications of Reticulated Vitreous Carbon (RVC[®]) in the Electrochemical Power Sources** — Rogulski Z., Lewdorowicz W., Tokarz W. and Czerwiński A.
- 1371 **Polymer Electrolyte Based on Ionic Liquid (EMIm)₃PO₄ as an Electrolyte for Electrochemical Capacitors** — Lewandowski A. and Świdowska A.
- 1379 **Modification of Catalytic Activity of Cu-Ti Amorphous Alloy Ribbons by Cathodic Hydrogen Charging** — Pisarek M., Janik-Czachor M., Kedzierzawski P., Molnár Á., Rác B. and Szummer A.
- 1391 **Electrochemical Formation and Properties of (Ir+Pb) Oxide** — Piekarska A., Elżanowska H. and Birss V.I.
- 1413 **Electronic Aspect of Intercalation in Layered, Spinel and Olivine Type Cathode Materials** — Molenda J.

Electrochemistry of Conducting Polymers and Modified Electrodes

- 1423 **Impact of an Electrolyte Used for Electrodeposition of Polypyrrole on Ion Transfer and Bulk Resistances of the Polymer Electrode** — Grzeszczuk M.
- 1431 **Electrochemical Formation of Two-component Films from 2'-Ferrocenylpyrrolidino-[3',4';1,2][C₆₀]fullerene and Transition Metal Complexes** — Płońska M.E., Makar A., Winkler K. and Balch A.L.
- 1449 **Ceramic Carbon Electrode Modified with Redox Probe and Salt Solution in Hydrophobic Polar Solvent** — Shul G. and Opallo M.
- 1457 **Composite Ni-P + TiO₂ Electrocoatings for Hydrogen Evolution Reaction in Alkaline Solutions** — Łosiewicz B., Budniok A., Lasia A. and Łągiewka E.
- 1477 **Studies on Spontaneous Discharge of Oxidized Polypyrrole and Poly(N-methylpyrrole)** — Dumańska J. and Maksymiuk K.
- 1493 **Interfering Effect of Surfactants on Electrochemistry of Poly(pyrrole) Conducting Polymer Films** — Nadrzycka U. and Michalska A.
- 1509 **Electrooxidation of o-Aminobenzylalcohol – Identification of Oligo-benzylether Structures and Polyaniline Type Polymer by IR and UV/VIS Spectra** — Boczek B. and Palys B.
- 1523 **Electrooxidation of Poly (p-Aminoazobenzene) Films – Kinetic Studies** — Frydrychewicz A. and Jackowska K.
- 1533 **Synthesis, Electrochemical and Spectroelectrochemical Properties of Viologen Derivative of PEDOT** — Czardybon A., Żak J. and Łapkowski M.
- 1543 **Conducting Polymer Films as Model Biological Membranes. Electrochemical and Ion-Exchange Properties of PPy and PEDOT Films Doped with Heparin** — Paczosa B., Błaż T., Migdalski J. and Lewenstam A.

Physical and Organic Electrochemistry

- 1553 **Parallel Electrode Processes in Absence of Supporting Electrolyte. Further Strong Enhancement or Depression of Transport of Ionic Species** — Nowicka A., Hyk W., Stojek Z. and Ciszowska M.
- 1567 **Does Electro-oxidation of 1-Ethyl-naphthalene Proceed Similarly as that of 2-Ethyl-naphthalene?** — Sioda R.E., Frankowska B., Lobuzińska A. and Fahidy T.Z.

- 1575 **Anodic Oxidation of Trolox in Aqueous Solutions** — Małyshko J. and Mechanik M.
- 1583 **Cognitive Aspects of the Cap-Pair Effect** — Sykut K., Dalmata G., Marczevska B. and Saba J.
- 1597 **A Voltammetric Study of the Reduction of Triptindanones in *N,N*-Dimethylformamide** — Jaworski J.S. and Kuck D.
- 1605 **Cyclic Voltammetric Study of the Complexation of Pb²⁺ Ions by Dibenzopyridino-18-crown-6 in Some Nitriles** — Chojnacka-Kalinowska G. and Kalinowski M.K.
- 1611 **The Influence of Solvent on the Reaction Between Iron (II), (III) and *tert*-Butyl Hydroperoxide – Electrochemical Catalytic Processes of Reductants** — Paczeński T. and Sobkowiak A.

Analytical Electrochemistry

- 1619 **The Application of Magnesium Ion Selective Electrode in Clinical Analysis** — Malon A., Brockmann Ch., Fijalkowska-Morawska J., Rob P. and Maj-Zurawska M.
- 1627 **Voltammetric Determination of Cr(VI) in the Presence of Cr(III) with Application of CDTA as a Masking Agent** — Grabarczyk M., Kaczmarek Ł. and Korolczuk M.
- 1635 **Multi-Scan Voltammetric Determination of Carbohydrates at Noble Metal Microelectrodes Following Flow Injection and After Capillary Electrophoresis Separation** — Basa A., Krogulec T. and Baranski A.S.
- 1655 **Design of Ferrocene Organothiol Monolayer as Intermediate Phase for Miniaturized Electrochemical Sensors with Gold Contact** — Sęk S., Bilewicz R., Grygolewicz-Pawlak E., Grudzień I., Brzózka Z. and Malinowska E.
- 1667 **Influence of the Transport Conditions on Determination of Trace Arsenic by Cathodic Stripping Voltammetry** — Piech R., Kubiak W.W. and Gołaś J.
- 1679 **Sol-Gel Immobilization of Aldehyde Dehydrogenase and NAD⁺ on Screen-Printed Electrodes for Designing of Amperometric Acetaldehyde Biosensor** — Noguez Th., Szydłowska D., Marty J.-L. and Trojanowicz M.
- 1691 **Application of Isotachophoresis for Determination of Anionic Forms of Phosphonic Acids** — Górecki H., Szczygieł B. and Drela I.
- 1703 **Anodic Stripping Voltammetry in the Presence of Fumed Silica and Nonionic Surfactants** — Kubiak W.W., Kamiński A., Niewiara E. and Baś B.

Corrosion, Passivation and Selected Topics

- 1719 **Molecular Geometry as a Source of Chemical Information. Part I: How H-Bonding Modifies Molecular Structure in the Vicinity of Hydrogen Donating Group. The Case of Phenol Derivatives Interacting with Nitrogen and Oxygen Bases** — Szatyłowicz H. and Krygowski T.M.
- 1733 **Contribution of Electrochemistry to the Knowledge on Structure and Properties of Amalgams** — Gumiński C.
- 1753 **Measurements of Interfacial Area in Helicoidal Reactor** — Wroński S. and Ryszczuk T.
- 1765 **Molecular Interactions in Binary Mixture of Nitrobenzene/Decahydronaphthalene Studied by Dielectric Methods** — Dutkiewicz M. and Dutkiewicz E.
- 1777 **New Application of 1,1,3,3,3-Pentafluoropropene-diethylamine Adduct (PFPEA) as Fluorinating Agent. Synthesis of 3,3,3-Trifluoropropionates of Vicinal Fluorohydrins** — Walkowiak J., Haufe G. and Koroniak H.
- 1785 **The Synthesis, Structure and Complexing Properties of New Triazacoronands** — Nikonowicz A., Grzegorzewski P., Pałys M. and Jurczak J.
- 1795 **Simulations of Corrosion Processes with Spontaneous Separation of Cathodic and Anodic Reaction Zones** — Vautrin-UI C., Chaussé A., Stafiej J. and Badiali J.P.

- 1811 **Potential and Strain Rate Impact on the Electrochemical Properties of 304L Stainless Steel Under Tensile Stresses** — Darowicki K., Orlikowski J. and Arutunow A.
- 1823 **Evaluation of Relative Humidity Effects on Interfacial Impedance at Inter-Coat Interfaces** — Miszczyk A., Darowicki K. and Schauer Th.
- 1833 **Degradation of Organic Coatings Subjected to Alternating Mechanical Stress Impact** — Darowicki K. and Szociński M.
