

CONTENTS

- 993 **Editorial** — Szymański S.
- 995 **Professor Michał Witanowski** — Szymański S
- 997 **Nitrogen NMR: an Historical Perspective** — Webb G.A.
- 1009 **Application of ^{31}P Magnetic Resonance Spectroscopy to Observation of Phospholipid Concentration Changes in Blood Serum, Plasma, Peripheral Blood Mononuclear Cells and Bone Marrow Mononuclear Cells from Patients with Hematological Cancers – a Methodological Review** — Tuz M.A., Kuliszkievicz-Janus M. and Baczyński S.
- 1021 **Determination of the Absolute Configuration of 2-Hydroxyglutaric Acid, 5-Oxoproline and Vigabatrin in Urine by Chiral Derivatization and ^{13}C or ^{19}F NMR** — Bal D. and Gryff-Keller A.
- 1031 **Main Factors Governing Chemical Shifts of Carbon and Nitrogen in Cyano Group. An Experimental and Theoretical Study** — Molchanov S. and Gryff-Keller A.
- 1039 **Structure of 3-Hydroxy-3-methyl-pyrido[2,1-*c*][1,4]dihydrooxazinium Chloride Studied by X-ray, FTIR, ^1H , ^{13}C and ^{15}N NMR and DFT Methods** — Szafran M., Nowak-Wydra B., Katrusiak A. and Dega-Szafran Z.
- 1055 **Nuclear Magnetic Shielding and Indirect Spin-Spin Coupling Constants in Cyclopropane. Gaseous and Liquid NMR Measurements** — Makulski W. and Wilczek M.
- 1061 **NMR Properties of the Formic Acid Dimer** — Jaroniec J. and Jasiński M.
- 1075 **Evaluation of Boar Spermatozoa Motility by Pulsed Field Gradient NMR** — Banaś K., Banasik T., Szczęśniak-Fabiańczyk B., Gogol P., Wierzuchowska D. and Jasiński A.
- 1083 **^{15}N NMR Coordination Shifts in Transition Metal Chloride Complexes with Azines *versus* Type of Central Ion** — Pazderski L.
- 1095 **^{63}Cu and ^{31}P Nuclear Magnetic Resonance for Characterization of Cu(I) Complexes with P-Donor Ligands** — Szymańska I.
- 1119 **On the Influence of Low-Frequency Magnetic Field Disturbances on Basic High Resolution NMR Experiments** — Kazimierzczuk K. and Koźmiński W.
- 1125 **Assessment of Metabolite Concentrations Changes in Rat Brain after Intravenous CDPcholine Injection Using Magnetic Resonance Spectroscopy *in vivo*** — Kulinowski P., Labak M., Majcher K., Herbiak A., Grieb P. and Jasiński A.
- 1133 **MR Imaging of Mouse Heart *in vivo* Using a Specialized Probehead and Gradient System** — Heinze-Paluchowska S., Skorka T., Drelicharz Ł., Chlopicki S. and Jasiński A.
- 1141 **^{13}C and ^{23}Na Solid-State NMR Spectra of Organosodium Compounds; Part II** — Jost S. and Günther H.
- 1155 **19-Methyl Analogs of Vitamin D₃: Synthesis and Structure Elucidation by ^1H NMR** — Szoka P.Ł. and Siciński R.R.
- 1169 **An Experimental Test for the Approximation of NMR Solvent Effects by Continuum Models. ^{19}F Gas-to-Solution Shifts of SF_6 and CF_4** — Jackowski K. and Wilczek M.
- 1177 **DFT Calculation of Nitrogen Chemical Shifts in the Active Site of Vitamin D Receptor** — Sicińska W.
- 1185 **^{29}Si and ^{13}C Solid State NMR as a Tool to Study Thermal Processes in Epoxy-Silica Hybrids** — Potrzebowski M.J., Ciesielski W., Ganicz K., Głuszek J., Szczygieł B., Kucharczyk B. and Masalski J.
- 1195 **Indirect Carbon-Carbon Spin-Spin Couplings in Nitrosobenzenes and Benzene. Experiment and Theory** — Biedrzycka Z., Kamińska-Trela K. and Witanowski M.
- 1209 **Structure Determination of Some Nitro-5,10,15,20-tetrakis(3-methoxyphenyl)porphyrins Using Simple NMR Techniques** — Ostrowski S., Łopuszyńska B. and Mikus A.

(continued on inside back cover)

(continued from back cover)

- 1217 **Low Temperature Measurements of Carbon-Carbon Spin-Spin Couplings in *s-cis* and *s-trans* Rotamers of Enaminoketones; Comparison with DFT Computations** — Bugaj M. and Kamińska-Trela K.
- 1233 **Damped Quantum Rotation of the Methyl Group in Liquid-Phase NMR Spectra of 9-Methyltryptene Derivatives** — Czerski I. and Szymański S.
