Audio Interviews

- [Exclusive Interview with Nanosys Inc.](#) - "Company Develops Small Tech with Big Vision"

Exclusive Articles

- [A Tiny Way to Play Something Huge: The Nanotech Promise posted January 26, 2006](#) (TINY) Few "new" technologies have stirred as much controversy as nanotechnology - the science of how to exploit behavioral quirks that develop in materials when you smash them up into really tiny particles. - [click here](#)
- [Nanotechnology: Valuing Clean Nanotech Investments is No Small Matter posted March 15, 2006](#) - Walking down Southampton Row in central London, a perceptive pedestrian may suddenly discern that the air is cleaner. The sidewalk has been treated with a nanotechnology-enabled product containing catalytic properties that break down molecules in harmful pollutant emissions in the air - [click here](#)
- [NanotechnologyInvestment.com Reports: Revolutionary Nanotechnology Developments Part 2](#) - Innovations in Renewable Energy and Homeland Defense Attributable to Nanotech - the second instalment of a two part report detailing the current advancements in the science of Nanotechnology, and specifically as those innovations impact diverse sectors such as Renewable Energy and Homeland Defense. The emerging science is being embraced by everyone from giant corporations like **Ford (NYSE: F)** and Boeing, to smaller manufacturing firms like solar energy technology developer **XsunX (OTCBB: XSNX)**. - [click here](#)

What is Nanotechnology?

- The ability to do things - measure, see, predict and make - on the scale of atoms and molecules. Traditionally, the nanotechnology realm is defined as being between 0.1 and 100 nanometers, a nanometer being one thousandth of a micron (micrometer), which is, in turn, one thousandth of a millimeter.
