'Super socks' help stem pollution runoff

23.07.2010 16:47 eurekaalert.org (2)

Agricultural Research Service scientists and their collaborators have improved on an existing method for removing contaminants from storm water runoff. These findings could provide surface waters additional protection against runoff containing pollutants from point sources such as construction sites, storm

Competition matters: New study challenges long-held assumption about competition in disturbed ecosystems

29.06.2010 10:17 sciencedaily.com

Hurricanes, wildfires and influxes of pollutants create disturbances that can put ecological systems under extreme stress. Ecologists had believed that at times like these, competition between species becomes less important as all struggle to survive. But a new laboratory study
